Statistical confidentiality	Variables are excluded from the data for legal and nondisclosure purposes. This includes all of the auxiliary variables or the auxiliary characteristics (e.g. names or addresses).
(2019 not usable)	Variables cannot be used analyzed and are therefore excluded.
Reserve	These input fields are reserved for future microcensus.
use variable EFXX	also referred to as (identical with variable EFXX) These variables are derived from the mentioned ones, albeit containing the same data. As to avoid confusion, variables with identical data content are dropped from the dataset (e.g. variable 'Federal State' would be included twice in the dataset: once in alphabetical order and once sorted by State ID)
(2019 not assigned)	Specific input fields are reserved for ad-hoc module or additional program used in other microcensus years. These variables doesn't contain any data and are solely used as placeholder for the variables.
Pseudonymization for municipalities located in Bavaria in case of use at RDC	In the data, available at the safe centres the community key for Bavarian municipalities is pseudonymized (digits 6 to 8 in the official community key). The municipalities are randomized within their administrative districts. Enumerated beginning with 901. The variable still contains the determination of the municipality level, but prevents possible re-identification.
